Portfolio: ahmed-salem-hussein-0yren05.gamma.site

Summary

Mobile developer and recent Computer Science & Artificial Intelligence graduate, building cross-platform apps with **Flutter** and native Android apps with **Kotlin** and **Jetpack Compose**. Hands-on experience with **Firebase**, **REST APIs**, local storage, and on-device AI (**TensorFlow Lite**), gained across 2 internships (mobile development and computer vision) and 4 app projects. Comfortable with **MVVM**, **BLoC/Cubit**, and Agile teamwork using Git and GitHub.

Technical Skills

Mobile Development: Flutter (Dart), Android (Kotlin), Jetpack Compose, MVVM, BLoC/Cubit

Data & Backend: Firebase (Auth, Firestore, Storage), REST APIs, Retrofit, Hive, DataStore, SharedPreferences

AI & Computer Vision: TensorFlow, TensorFlow Lite, PyTorch, YOLOv5, Transfer Learning, Image Classification, Object Detection, Gemini API

Programming Languages: Dart, Kotlin, Java, Python, C++

Tools & Design: Git, GitHub, Docker, Postman, UI/UX Design

Work Experience

Mobile Development Intern — Nov 2024 – May 2025

DEPI, YAT (El Maadi, Cairo)

- Developed Android applications with **Kotlin** and cross-platform mobile apps using **Flutter**.
- Integrated **Firebase** Authentication, Firestore, and Cloud Storage for secure real-time data handling.
- Embedded AI features into mobile apps including **image classification** and **object detection** with **TensorFlow Lite**.
- Optimized app performance through API call reduction and intelligent data caching strategies.
- Delivered tasks on schedule within **Agile** sprints in a collaborative team of 4 developers.

Computer Vision Intern — Jul 2025 – Aug 2025

NTI (Online)

- Built and fine-tuned deep learning models for **object detection** and **image classification** using **TensorFlow**, **PyTorch**, and **YOLOv5**.
- Preprocessed and augmented a dataset of **20,000+ images** to improve model accuracy, generalization, and robustness.
- Applied **transfer learning** on pre-trained CNN models, achieving a **+7% accuracy improvement** over baseline.
- Collaborated via **Git/GitHub** and managed reproducible experiments in **Docker** environments.

Projects

SpotiFit – AI Fitness Coach (Graduation Project) — github.com/Ahmed-27th-deff/SpotiFit-Flutter

Flutter | REST API | AI Chatbot | View Demo

Fitness coaching app with AI-powered guidance, workout tracking, nutrition management, and progress analytics.

- Connected the backend API and the AI chatbot to the app.
- Designed all 8 app UI screens.
- Implemented the full logic and UI for the home, exercise, and chatbot screens.

Event Countdown — github.com/Dinabdullah/Event-Countdown

Kotlin | Jetpack Compose

Android app to create, view, and manage events and holidays with live countdowns, with onboarding, login/signup, theming, localization, and persistent storage.

- Built the app drawer and all settings screens (logic and UI) in Jetpack Compose, with 3 theme modes (Dark/Light/System) and 2 language preferences (Arabic/English).
- Built the Edit Event screen (logic and UI) in Jetpack Compose for updating existing events.

Timor AI – AI Personal Assistant — github.com/Ahmed-27th-deff/Timor-Ai-Module

Flutter | Gemini API | Speech Recognition | Text-to-Speech | View Demo

AI assistant app for chatting with Gemini, sending image prompts, and using voice input and spoken replies, with a Material dark theme.

- Integrated Gemini AI with `flutter_gemini` for chat and image-based prompts (`image_picker`).
- Built a virtual assistant screen with voice input and spoken replies using `speech_to_text` and `flutter_tts`.
- Designed and implemented 3 UI screens (Home, Chat, Virtual Assistant) with Lottie animated feedback, toast/snackbar messages, and custom branding (launcher icon, splash screen, custom font).

Ping-Pong – Real-Time Chat App — github.com/Ahmed-27th-deff/Ping-Pong-Chat-App

Flutter | Firebase Auth | Cloud Firestore

- Built the full app, designing and implementing all 3 screens (login, register, chat) with route-based navigation.
- Implemented authentication with Firebase Auth and real-time message syncing with Cloud Firestore.
- Added loading states, snackbar feedback, custom theming, and reusable widgets.

Education

Banha University – Bachelor of Computer Science in Artificial Intelligence — Sep 2022 – Jun 2026

Certifications & Languages

Certifications: Mobile App Development (DEPI Internship), Computer Vision (NTI Internship)

Languages: Arabic (Native), English (Professional Proficiency)
